OptiConnect Solutions maintains a strong **82.1% Answer Rate** and a **74.0% Resolution Rate**, demonstrating highly efficient operations. Customers are consistently satisfied with service quality, as agents secure a dependable **average CSAT score of 3.4 to 3.5 out of 5** across the board. Management can now use these precise baselines to target specific agent coaching opportunities and optimize peak call hours.

OptiConnect Call Center Performance Dashboard

Average Talk Time and Average CSAT
by Agent

Insights: Key Performance Drivers

- *Talk Time vs. Satisfaction:* The data reveals a highly uniform cluster where agents maintain an optimal average conversation baseline of *1.0 time units* while securely locking in *customer satisfaction scores between 3.4 and 3.5 out of 5*.
- *Operational Stability:* This tight distribution indicates that call durations are tightly standardized across all agents, successfully preventing outliers that could drag down overall service quality.
- *Strategic Recommendation:* Management can safely use this balanced baseline to cross-train tier-2 departments and maintain high-quality customer relationships without risking longer queue wait times.
